FOREWORD

This report presents a complete listing of all capital improvements authorized by the General Assembly during the years 1955-1969, which compilation will serve as a useful reference to State officials, legislators and others in the consideration of future capital improvement projects of the State.

If information is desired on capital improvement projects authorized prior to 1955, reference should be made to State Planning Department Publication No. 129 entitled, "Capital Improvements Authorized By General Assembly 1947 through 1964" dated September 1964.

This report spans the fifteen-year period, 1955-1969, and indicates the extent of the programs to overcome critical deficiencies and provide for the expanding growth of the State. It discloses that during this period the expenditure of more than $905,708,340 has been authorized by the General Assembly for capital improvements, exclusive of highways.

The report sets forth a summary of the authorized expenditures by major functions for both State-owned and non-State-owned capital assets; a tabulation of legislative fund authorizations; and a detailed compilation, by agency and institution, of all projects that have been authorized during the fifteen-year period. The Department of State Planning, of course, is primarily concerned with State-owned capital assets. Expenditures authorized for non-State-owned capital assets are included primarily to present a complete picture. The chart, on Page 9, shows authorized capital improvement expenditures by basic function for both State-owned and non-State-owned capital assets.
